

# INSTRUCTIONS FOR LAB2

January 14, 2018

1. Function names should be same as those mentioned in the assignment.
2. Function `poly` and `check_poly` take integers as input. All other functions will take float as input. So, students should write functions accordingly.
3. Run button will open an ocaml interpreter (terminal) which students can use if needed (e.g ocaml interpreter not present on the system).
4. For evaluation of the files uploaded on moodle, click on the evaluate button. Grade scored is displayed after evaluation.
5. Grade displayed is the sum of the scores obtained corresponding to each of the 4 files submitted. Each file has 25% weightage.
